

Actions to Improve CAB Scores in AWB Transport Inc

At AWB Transport Inc., we are committed to improving our CAB scores and maintaining the highest standards of safety within our trucking operations. We have implemented a range of strategic measures that target driver behavior, vehicle maintenance, regulatory compliance, and the fostering of a culture focused on safety. Here's how we're actively working to enhance our CAB scores:

1. **Driver Training Programs:** We have rolled out comprehensive driver training initiatives aimed at educating our drivers on safe driving practices, defensive driving techniques, and adherence to all trucking regulations. Our training programs are designed to build awareness and reinforce our commitment to road safety.
2. **Telematics Systems for Real-Time Monitoring:** AWB Transport Inc. has invested in advanced telematics technology, which is installed in all our vehicles. These systems monitor driver behavior in real time, tracking metrics such as speed, braking, and acceleration. By offering immediate feedback, our telematics system helps us address risky driving behavior and improve overall safety.
3. **Regular Vehicle Maintenance and Inspections:** We prioritize the safety of our fleet by implementing a rigorous maintenance schedule. Our vehicles undergo regular inspections to ensure that all components—such as tires, brakes, and steering systems—meet or exceed safety standards. This proactive approach helps prevent mechanical issues that could lead to accidents.
4. **Strict Enforcement of Hours-of-Service Regulations:** At AWB Transport Inc., we strictly enforce hours-of-service (HOS) regulations to prevent driver fatigue. By ensuring that our drivers have sufficient rest and break periods, we minimize the risk of accidents caused by drowsy driving, keeping our fleet safe and compliant.
5. **Encouraging Safety Reporting and Open Communication:** We have established a company-wide culture that encourages safety reporting. Our drivers are empowered to promptly report safety concerns, near-miss

incidents, This approach allows us to address issues before they become larger risks, ensuring a safer environment for all.

6. **Driver Performance Reviews:** We regularly assess driver performance through detailed reviews of CAB scores and individual feedback. This data allows us to identify areas for improvement and offer additional training or coaching where necessary, helping our drivers grow and maintain high safety standards.
7. **Analyzing and Addressing Safety Trends:** Our safety team continuously analyzes data to identify trends and recurring issues within our operations. By spotting patterns early, we can implement proactive measures to address potential risks before they escalate.

Through these combined efforts, AWB Transport Inc. is dedicated to improving our CAB scores and ensuring the safety of our drivers, vehicles, and the communities we serve.
